

LS25 / Full Proposal / Applicant Response Phase

Applicant Response Phase (10th - 17th of February 2026, 2pm (CET))

The purpose of the applicant response step is to allow the core team to correct any factual errors or conceptual misunderstandings in the external peer reviews. The applicants should respond directly to reviewer comments in a constructive manner.

Scope of applicant response

As much as possible, the applicant response should refer to parts of the full proposal where the reviewer's concerns are already addressed. Only where necessary and appropriate, should references to peer-reviewed publications in order to correct any factual inaccuracies in the reviews be provided. In addition to providing the DOI, applicants should clearly specify the section (figure, data, text) of the publication that supports their response. Pictures, graphs, or other documents themselves cannot be inserted or attached.

- The applicant response must not be regarded as an opportunity to extend the full proposal. Elaboration upon aspects of the full proposal with more detail is not permitted.
- New information, including new research results and methods, should not be provided.
- Applicant responses should not include references to any new awards, appointments, or publications that may have occurred since the submission of the full proposal.
- Response should be clearly presented, objective and concise. The limit of **3,000 characters** (with spaces) applies for all teams. Thus, only include information that clearly addresses the points of the reviewer.

Both the scientific workplan and CVs are assessed as at the time of the full proposal submission, and therefore no updates should be provided. Such additional information will not be considered by the jury members.

Process for applicants

- All steps of the applicant response phase will proceed over the WWTF Funding Portal.
- Applicants will be given 7 calendar days to respond to the peer reviews (10th - 17th February 2026, 2pm (CET)).
- All core team members will receive an email notification from the Funding Portal when the applicant response phase is open. Core team members are therefore strongly advised to regularly check their provided email address during the indicative time period.

- All core team members will have access to the anonymized reviews for their proposal and have the opportunity to edit the response.

Only the PI&C can submit the final applicant response.

What will happen to the applicant response?

- The applicants' response will be provided to the panel after the panel has received all external reviews and prior to the panel meeting to determine funding.
- Applicants' responses will not be viewed by the external reviewers.
- The jury panel will be briefed about the scope of permitted responses and informed to ignore responses that fail to observe these guidelines. Panel members will consider how well applicants have addressed any concerns raised by the reviewers and will consider additional valid evidence provided within the response.
- Please note that, depending on its content and quality, the applicant response can potentially have positive and/or negative effects on the evaluation of the proposal by the jury panel.

Submission of a response to reviews is not compulsory. However, the jury panel will be informed that all teams were provided with the opportunity to respond to reviews.
