# VRG26 / About the Vienna Research Groups for Young Investigators Program

As the aim of the VRG program is to strengthen Vienna as a research location by attracting talents who will provide new expertise and input for the Viennese research landscape, VRG leaders must be recruited from an institution outside of Austria. VRG leaders are independent in designing their research work and recruiting staff. Over the years, they are expected to attract additional and increasing third-party funding.

# VRG26 / Scope of the call

This call is open to all topics and areas in Environmental Systems Research, and researchers from all disciplines (e.g., natural sciences, engineering, social sciences, health sciences, climate research ...) are welcome. The future Vienna Research Group is expected to develop a distinctive research profile that tackles fundamental and interdisciplinary questions in environmental research using cutting-edge methodologies. Their research should aim to significantly expand current knowledge and have the direct potential to contribute to meaningful societal advancements. Research that extends beyond academia and aims to build strong collaborations with non-academic partners is strongly encouraged.

# VRG26 / Submission process and deadline

The application process for the Vienna Research Groups program includes the following steps:

- **Submission of a proposal:** concise proposal demonstrating the candidate's qualifications and proposed research
- **Participation in a hearing:** presentation of proposed research and Q&A with jury (online participation by the VRG candidate)

**Proposal Deadline:** 10 March 2026, 14:00 CET

**Hearings:** September 2026, date will be communicated as soon as possible (check <https://fundingportal.wwtf.at/> regularly)

## Important information for the submission of your proposal

- Applications must be submitted via the **WWTF Funding Portal** at <https://fundingportal.wwtf.at/> within the deadline stated above.
- The structure and content of the application are described in more detail in the [Submission Guideline](#).
- Important: The application process requires the signature of an authorised person from the future host institution ("authorization"). Please contact the host institution you're applying with to find out about their internal processes and timelines.
- We recommend registering and creating a proposal to find out what the requirements are, even if you are not yet sure whether you want to submit one. Any proposals that are not submitted will be deleted shortly after the deadline for the call.
- The application must be written in English.
- Please check with the host institutions for information on any pre-selection deadlines.

Applications must be submitted via the online Funding Portal at the deadline indicated in the call specifications. Submissions after the deadline will not be considered.

# VRG26 / Eligibility of applicants and roles in the project

The general eligibility of applicants is specified in the [/ WWTF Funding Guideline](#).

An application is prepared in tandem: the future **VRG leader ("VRG candidate")** applies together with the **proponent**, who represents a research institution in Vienna.

## **Role & responsibilities of the proponent:**

- The proponent is an established scientist based at a university or non-profit non-university research institution (public or private) in Vienna ("host institution") that intends to hire an excellent young researcher from abroad.
- The host institution is responsible for the selection of the VRG candidate, for the application process itself, as well as for providing a well-defined career path for the candidate.
- Active recruitment procedures are mandatory. The search for the VRG candidate is carried out by the host institution. International publication of the job advertisement - e.g., in a high impact journal that is relevant for the topic and/or via professional societies/ mailing lists - is compulsory. For promotional purposes, the host institution may provide the link / a digital copy of the job advertisement to the WWTF, for publication on the WWTF website.
- The proponent is responsible for the coordination of the application at the host institution and supporting the VRG candidate at every stage of the application. In case of funding, the proponent is also responsible for the integration of the candidate in the host institution.

## **Role of the VRG candidate & eligibility criteria:**

VRG candidates are young researchers, generally postdocs, who seek to advance their research career by establishing an independent research group and assuming leadership responsibility for several group members.

As the aim of the VRG program is to strengthen Vienna as a research location by attracting talents who will provide new expertise and input for the Viennese research landscape, VRG leaders must be recruited from an institution outside of Austria. VRG leaders are independent in designing their

research work and recruiting staff. Over the years, they are expected to attract additional and increasing third-party funding.

- Researchers who can apply for this call are up to eight years after PhD, counting backwards from the submission deadline of this call (this year, the cut-off date is March 10 2018). Care duties may extend this period by up to four years, please find information on the extension grounds below.
- At the time of application, VRG candidates must be based at home institutions outside of Austria. This means the VRG candidate
  - (i) must not have an employment contract with an Austrian institution in the timeframe between three months before the submission deadline to the submission deadline, and
  - (ii) must have been employed at a foreign research institution for at least two years in the last three years before the submission deadline.
- WWTF also welcomes applicants with Austrian citizenship who wish to return to Austria.
- Please note that the aim of the VRG program is to bring new competences to Vienna.

**WWTF encourages Vienna-based research institutions to actively search for female candidates.**

In the case of successful appointment of a woman, the Vienna host institution may apply for additional financial measures (["Gender Mainstreaming Bonus"](#)) from the WWTF to support their gender mainstreaming activities.

**WWTF offers a Dual Career Service Support for partners of VRG leaders.**

Costs for childcare and / or career coaching for female WWTF-funded personnel may be covered under special conditions to a small degree.

**Provisions regarding the extension of the eligibility period of VRG candidates.**

WWTF takes into consideration career breaks due to care duties and/or sickness. The maximum prolongation period is 4 years (48 months). **Please contact WWTF before submitting your proposal if you have doubts regarding your eligibility.** Prior to contacting WWTF, please read and fill out [this document](#).

## **Non-university institutions as host institutions of VRG leaders**

In the case of non-university institutions as host institutions, academic links to a university partner must be demonstrated in the application (for example, in the form of a signed letter of intent by the university partner), to ensure integration into an academic teaching environment in Vienna. This is to enhance the prospects of a potential future at a university in Vienna.

The following points have to be addressed in the corresponding sections of the proposal:

- Guarantee of scientific independence of the VRG leader and guaranteed establishment of own research group of the VRG leader at the host institution.
- Permanence of the career track: permanent position at the latest after successful interim evaluation.
- Independent supervision of Master students and PhD candidates.
- Teaching opportunities.

### **Additional partners:**

- Additional research partners (“cooperation partners”) may also be involved in and contribute to the work of the VRG group. If these partners contribute substantially to the VRG project, they are eligible to receive funding from the VRG project. They also may provide resources and funding for the project as in-kind contributions.
- No industry involvement is required. Industry partners are not eligible for funding. However, they might participate in the project with in-kind contributions, both through financial or further resources.
- Partners may be affiliated to institutions in or outside Vienna (including international partners). Partners inside and outside Vienna are optional and not a requirement for application.
- Partners outside of Vienna may receive up to 20% of the total requested funding.

“Home institution” refers to the VRG candidate’s institution at the time of application, i.e., the institution outside of Austria to which they are currently affiliated.

“Host institution” refers to the VRG candidate’s future host institution in Vienna, i.e., the institution where they plan to start their research group.

# VRG26 / Career perspectives and funding phases

The VRG program emphasizes that the contractual arrangement and institutional position of the VRG group leader should be structured to support a clear long-term career trajectory, with the ultimate aim of securing a tenured appointment at the host institution in Vienna.

The path towards a tenured position (or an equivalent career path) must be specified in the proposal. WWTF expects a qualification agreement (“Qualifizierungsvereinbarung”) to be signed **within three months after the start of the project**. See next chapter ["Interim evaluation"](#) for more information.

It is important that the prospective host institution in Vienna provides a well-defined career plan for the candidate, including allowing for **independent supervision of PhD candidates upon commencement of the contract**. The details stated in the proposals will be the basis of the contract in the case of funding.

The funding period of the Vienna Research Group is between six to eight years and has two phases.

- The first phase is the phase before the career step / interim evaluation of the VRG candidate.
- The second phase is the phase after the VRG candidate's career step, e.g. after the positive interim evaluation. In case of a negative result of the interim evaluation, the funding of the group will be discontinued after a "phasing out" period (max. 1 year).

# VRG26 / Interim evaluation

One of the main objectives of the VRG programme is to enable recipients to pursue a career path that leads to a full professorship. In Austria, this typically occurs via a career position, in accordance with UG2002 (for organizations that fall under the UG2022). Obtaining a full professorship is, however, not part of the VRG program rationale, since it requires either an open external appointment procedure or an internal call for applications for a certain number of dedicated positions.

Therefore, VRG leaders are expected to advance to Associate Professorship within the duration of the Vienna Research Group. Upon starting work at the host institution, VRG leaders are offered a qualification agreement („Qualifizierungsvereinbarung“, „QV“). Depending on the institution, this either happens immediately upon entry to the university, or after a few months (WWTF asks for a maximum of 3 months upon start of the work contract, until the QV is offered and signed). Once a QV has been signed, the VRG leader is listed as an „assistant professors“. These positions are temporary.

In the QV, the criteria for promotion to associate professorship are defined. After a certain period of time (depending on the institution and the individual agreement between host institution and VRG leader), usually 2-4 years, an interim evaluation of the VRG leader's performance is carried out at the host institution.

From WWTF's perspective, there are different scenarios for the interim evaluation:

## **Scenario 1: Evaluation of the QV involving external experts**

WWTF wishes to be involved in this process, as stipulated in the contract. This is typically done by WWTF appointing an external reviewer. As soon as the QV review process is initiated, the host institution approaches WWTF regarding the nomination of a reviewer.

## **Scenario 2: Evaluation of the QV with predominantly formal internal assessment.**

If the university's evaluation process does not include external reviews, WWTF will conduct its own, moderate, evaluation after 3-4 years runtime of the project. WWTF's evaluation can take place at a later date than the QV evaluation by the host institution.

## **Scenario 3: Interim evaluation by the WWTF without a QV agreement.**

If there is no QV agreement (e.g. if the VRG leader starts as associate professor or higher), WWTF will conduct its own, moderate, evaluation after approximately three to four years.

The evaluation step usually takes place between year 2-4 of a VRG grant. Earlier dates are possible. In case of a negative result in the interim evaluation, the funding of the group will be discontinued after a “phasing out” period (max. 1 year).

# VRG26 / Funding and evaluation criteria

The following criteria are used throughout the evaluation process:

## Scope

- Is the project within the scope of the call as described in the call specifications? Projects which are not within the thematic scope will be immediately rejected by the jury, regardless of the scientific quality.

The key criterion in the evaluation of applications is **scientific quality**. This means both the submitted project and the candidate must be scientifically outstanding. This will be assessed using the following criteria:

## Quality of the VRG candidate

- **Scientific excellence and academic potential of the applicant:** Accomplishments and potential of the applicants to conduct the proposed research and to go beyond the state of the art. Candidates should have substantial research experience and research outputs. This should be demonstrated through a record of high-quality publications (in peer reviewed journals) and comparable achievements. Academic achievements will be evaluated in accordance with academic age.
- **Independent thinking and leadership:** Demonstration of the VRG candidate's leadership potential and capacity to conduct independent research.

## Quality of the proposed research

- **Innovative character of the proposed research:** Does the proposed research work meet the highest relevant international quality standards? Does the project show scientific originality and innovative aspects? Are the methods and research approaches appropriate and innovative?
- **Feasibility:** Is the timeframe sufficient for carrying out the project? Are the proposed resources suitable to achieve the goals? Is the budget adequate?
- **Consideration of gender aspects:** has the relevance of potential sex-specific and gender-related aspects of the proposed project been considered and explained throughout the proposal?
- **Relevance:** What is the project's mid-to long term academic, societal and economics impacts, particularly with regard to Vienna?

## Fit to the research environment at the new host institution:

- **Integration into the research environment:** Plans and commitments for the integration of the VRG candidate into the research environment of the host institution have to be described in the proposal. This includes a formal position in the university structure, integration into academic teaching, and authorisation to supervise master and doctoral students from the commencement of their contract.
  - If a non-university research institution applies for funding, the points listed [here](#) are considered important funding and evaluation criteria.
- **Career perspective:** A career model within the university, which offers the VRG candidate a long-term career perspective linked to evaluation of individual performance.
- **Continuation of funding / evaluation:** Clear concept for the interim evaluation involving WWTF.

## Other aspects:

- **Career breaks** such as for parental leave, care duties and longer illnesses will be taken into account in the evaluation of the proposals. Please indicate the time periods to allow them to be considered.
- Consideration of WWTF's **Gender Strategy and Equality Plan is mandatory.**

# VRG26 / Eligible costs

Funding should be used to cover the costs for the research group. All costs that are directly attributable to the project and are regarded as commonly required in the respective scientific field are eligible for funding. Please also consider your host institution's internal guidelines for eligible expenses/costs.

## Personnel costs

- WWTF is dedicated to funding researchers. Hence, the larger share of the project's budget should be allocated to personnel costs for researchers working on the project.
- Eligible forms of employment contracts are full-time and part-time contracts as well as marginal employments ("Arbeitsvertrag"). Contracts for services ("Werkvertrag") are only permitted if the nature of the work means that it cannot be performed through employment contracts. In general, it is assumed that the funding of individuals will be predominantly through employment contracts at the participating institutions and not through other types of employment.
- All persons employed through a WWTF-funded project should receive a fair employment contract with at least a minimum wage according to the "Kollektivvertrag" (collective agreement) of the Austrian Universities / non-university research institutions or – for staff employed at institutions with no collective agreement – according to the standards of the Austrian Science Fund (FWF, wage scheme available online, "FWF Personalkostensätze").
- Salaries higher than those stipulated in the collective agreement are possible, subject to the agreement of the host institution and justification based on the experience of the group leader and the researchers.
- Applications for personnel costs must be in one of the following categories:
  - PI/Group leader
  - Senior Personnel: highly qualified scientists, usually permanently employed
  - Post Doc: or equivalent qualification, including senior postdocs
  - PhD Candidate: or equivalent qualification level
  - MA/BA Student: Bachelor or Master students
  - Technician or equivalent (proportional funding only)
  - Data Manager/Steward (proportional funding only)
  - Student Assistant
  - Administrative Personnel (proportional funding only)

## Non-personnel costs

- Non-personnel costs should not exceed 30% of the overall budget. If non-personnel costs exceed 30% of the total budget, a justification must be included in the budget. Costs may incur in the following categories:

- Equipment: Smaller equipment can be purchased within the scope of the grant. This includes devices up to € 1,500 each as well as software specific to the projects. General office software is not eligible for funding. Funding by WWTF under this scheme is not intended to cover investment in general and larger infrastructure, however pro rata depreciation rates over the project duration for equipment necessary to the project may be funded.
- Consumables: Costs for project-related expenses, such as consumables. WWTF does not fund consumables that are general and not project-specific (e.g., paper, printer toner).
- Travelling: Costs for travel and accommodation for scientific meetings and conferences, field work, expeditions may be funded. Please also consider the regulations of your host institution for travel costs.
- Publication costs: Costs incurred for publication activities, such as printing costs, article processing charges (for open access), data management, etc. This also includes costs for archiving research data in open repositories. Please also consult WWTF's Open Science Policy.
- Data management: Costs for data access can be covered. The grant also covers costs incurred for data preparation in order to make the data accessible via a repository.
- Workshops and conferences: Costs for organizing events, workshops, and conferences are eligible.
- Other:
  - further third-party costs (e.g., external collaboration, consulting, studies, software development), as well as
  - costs for childcare needs resulting from project-related activities not covered through regular childcare (up to € 1.000),
  - career coaching for female WWTF-funded personnel up to € 5.000, not more than € 3.000 per person,
  - leadership education and training for VRG leader up to € 10.000,
  - relocation of the VRG leader up to € 5.000 (e.g. costs for moving furniture, costs for searching new apartment, cost of giving up old apartment. Not covered: costs related to furnishing the new apartment and renovation work in the new apartment).

Running costs for basic infrastructure (telephone costs, rents) as well as costs for the acquisition of infrastructure and basic equipment are not eligible for funding as these should fall under the category of overhead costs.

## Indirect costs (overheads)

Please note, WWTF offers a maximum of 20% overhead lump sum to compensate for all indirect/administration costs. Overhead is calculated as 20% of the direct costs of the project. This means that flat fees for payroll or project accounting charged to the project accounts are non-eligible direct costs. The total funding volume is calculated as direct plus indirect costs. Please consult the WWTF Reporting and Accounting Guideline for further information.

Applicants are required to comply with the overhead regulations of the involved institutions.

## **In-kind contributions**

In-kind contributions from the applicants should amount to at least 20% of the total project budget. These in-kind contributions must be described in detail. Generally, it should include the salary of the VRG leader after a positive interim evaluation.

Basic infrastructure (e.g., office premises, telephone, internet, laboratory space etc.) do not count as in-kind contributions. As these are not specific to the project, they should be covered by overheads. Other in-kind contributions may be in the form of in-kind involvement of project staff, consumables/software or monetary contributions.

# VRG26 / Gender aspects

[WWTF's Gender Strategy and Gender Equality Plan](#) must be considered throughout the application (for applicants, pages 19 and 20 of the document are especially relevant). Please note, that WWTF requests jury members and reviewers to take into account both gender in research team composition, as well as gender in research content during evaluation processes.

The following questions should be considered:

## **Equal opportunities in research**

- Please take into consideration gender balance/equality in the project consortium at all levels, including in decision-making positions, e.g., what steps have been taken to approach / achieve it?
- Do working conditions allow all members of staff to combine work and family life in a satisfactory manner?
- Are there mechanisms in place to manage and monitor gender equality aspects, e.g., workforce statistics?

## **Gender in research content and in the research ideas phase**

- If the research involves humans as research objects, has the relevance of gender to the research topic been analysed?
- If the research does not directly involve humans, have potentially differentiated relations of men and women to the research subject (e.g., relevance, impact of findings) been sufficiently considered?
- Have literature and other sources relating to gender differences in the research field been consulted?

## **Proposal phase**

- Does the methodology ensure that (possible) gender differences will be investigated: that sex/ gender differentiated data will be collected and analysed throughout the research cycle and will be part of the final publication?
- Does the proposal explicitly and comprehensively explain how gender issues will be handled?
- If there are no identifiable gender aspects after a detailed review by the applicants, this must be justified, e.g., by providing reasons to demonstrate that no sex, gender, and other relevant differences have been found.

## **Research phase**

- If there are further aspects of the project in which sex/gender could be a factor (e.g., samples, testing groups), are these gender-balanced?

- Are questionnaires, surveys, focus groups, etc. designed to unravel potentially relevant sex and/or gender differences in your data?
- Is data analysed according to the sex variable? Are other relevant variables analysed with respect to sex?

# VRG26 / Good scientific practice and ethics

Compliance with the **rules for good scientific practice**, including the observance of ethical aspects in research, is mandatory. This pertains to the application process and, in case of funding, the actual research work.

- WWTF is member of the Austrian Agency for Research Integrity (OeAWI) and thus committed to their standards for good scientific practice. Hence, applicants must comply to [OeAWI standards](#).
- In case of suspected scientific misconduct WWTF will employ the ombudsperson at the applicant's institution or request OeAWI to investigate the case.
- Based on the outcome of investigations by the ombudsperson or OeAWI, WWTF reserves the right to exclude the applicants and the application from the involved and future calls.

Research may include **ethical aspects** that require the approval from an ethics committee/institutional review board.

- If the candidate states, that approval from the ethics committee/institutional review board is required for the planned project, the approval ("Votum") must be submitted to WWTF in due time. The process of obtaining ethical approval shall start right after the VRG candidate has started their position at the new host institution in Vienna.
- The approval by the ethics committee should be specific for the planned WWTF project; therefore, the title of the project should be the same as on the approval (minor deviations are possible). If the title of the approved research differs significantly from the proposed project, a statement must be provided (in the online Funding Portal), confirming that the approval will cover the planned research.
- If the main applicant for the ethical approval is not the VRG leader, a clear statement must be included in the proposal, in which the VRG leader confirms that he/she is authorized to conduct the planned research within this ethical approval.
- If the planned research is covered by an existing approval, the applicants must submit the extension of the approval ("Verlängerung der Gültigkeit des Votums"). The above also applies for extensions.

# VRG26 / Open Science

WWTF requires compliance with its [Open Science Policy](#). This document outlines the rights, roles and responsibilities of WWTF, researchers, and research organizations.

# VRG26 / Use of generative AI

WWTF emphasizes the importance of human responsibility for the content submitted at all stages of the application process. Furthermore, WWTF recognizes that the use of genAI tools is pervasive and can facilitate proposal writing, for example in relation to improving written language. However, substantial use of genAI must be declared as such for the sake of transparency.

“Substantial use” is defined in line with the European Commission’s definition: “[...] using generative AI as a basic author support tool is not a substantial use. However, interpreting data analysis, carrying out a literature review, identifying research gaps, formulating research aims, developing hypotheses, etc. could have a substantial impact.” ([EC 2025: Living Guidelines on the responsible use of generative AI in research. Second Version, April 2025](#))

This mainly concerns critical parts of scientific relevance, such as hypothesis formulation and the scientific project plan. Applicants will be required to provide statements on the use of generative AIs at both the short and full proposal stages. WWTF emphasizes the importance of human responsibility for the content submitted at all stages of the application process. Images depicting real-world scenarios produced by generative AI must be declared.

WWTF does not allow the use of genAI in the final decision making process.

# VRG26 / Selection and decision process

## Call jury

- The core element of WWTF's decision making processes is an international jury mandated to provide a funding recommendation to the WWTF boards.
- Depending on the scope of the call, the jury is comprised of 5-8 outstanding international experts who have no current affiliation to an Austrian institution.
- Jury members are selected by WWTF prior to the submission deadline according to their expertise with regard to the call topic, and after a conflict-of-interest check. For details see section on reviewers below.
- Members of the jury will be published after the WWTF Board of Directors' formal funding decision.
- Please note that WWTF does not allow for rebuttals to recommendations by the jury panel or decisions by the WWTF Board of Directors.

## Formal eligibility check by WWTF

- WWTF office conducts a formal eligibility check of the proposal based on the criteria outlined in the WWTF Funding Guideline and in this document.
- Substantial deficiencies and missing items in the application will lead to the exclusion of the funding application from further evaluation and rejection on formal grounds. The strict timeline of the call does not allow for proposals to be sent back to the applicants for improvements and supplementing documents.

## Preparatory meeting 1

- Each proposal is independently assessed by at least two jury members based on the evaluation criteria.
- The jury decides if a proposal should be reviewed or rejected. This usually takes place 1 month after the submission deadline.
- Proposals that are not in the thematic focus of the call and that do not meet international scientific quality standards will be rejected at this stage and will not be considered for the review process.
- All applicants will be promptly informed about the decision. Rejected applicants will be provided with a short jury statement explaining the decision. Successful applicants will be informed that they have been admitted to the next stage.
- After the preparatory meeting, additional members may be added to the jury if additional expertise is required to cover the topics of the proposals.

## Evaluation of proposals / Review process

The proposals admitted to the next stage of the evaluation process will undergo a review process.

- WWTF will obtain a minimum of two (usually 3-4) written reviews for each proposal.
- Reviewers are recognized international experts in the topic(s) of the proposals. WWTF does not consider reviewers with an Austrian affiliation. WWTF aims for diversity in the cohort of reviewers (gender, age, countries).
- All reviewers are checked for potential conflicts of interests with the applicants by WWTF. As a rule, reviewers should not have close professional relations with the applicants. Practically, this excludes reviewers that have published with the applicants within the last five years or have had a collaboration in a research project in this timeframe. In case of very close cooperation with the applicants over a longer period of time, the reviewer will not be contacted. Joint publications in edited volumes / proceedings, “community papers” with more than 30 authors or common attendances in workshops and conferences do not qualify as conflict of interest. Additionally, reviewers are asked to disclose any potential conflict of interest.
- Reviewers will provide their assessment via a standardised questionnaire in the WWTF Funding Portal.
- The expert reviewers remain anonymous to the applicants.
- In the proposal submissions, applicants are asked to suggest 5 experts, whom they deem qualified to review the proposal. WWTF will check the reviewers for potential conflict of interests. WWTF is free to choose / not to choose any of the suggested experts. Jury members also nominate reviewers.
- Applicants may also exclude up to 3 persons without stating any reasons. Reviewers on the negative list will not be contacted.

## Preparatory meeting 2

- The jury decides which VRG candidates are invited to the hearing.
- Each proposal is again independently assessed by at least two jury members based on the evaluation criteria and taking into consideration the written reviews.
- This usually takes place 1-2 months before the hearings.
- All applicants will be promptly informed about the decision. Rejected applicants will be provided with a short jury statement explaining the decision and the anonymized reviews. Successful applicants will be informed that they are invited to the hearing. Invited applicants will receive the anonymized reviews after the formal funding decision by WWTF boards.

## Hearings and jury meeting

- At least two jury members are assigned to each proposal and act as rapporteurs for the proposals.
- The basis for the evaluation by the jury are the proposal, the candidate’s performance at the hearing, as well as the reviews.

- The VRG candidate's attendance at the hearing is mandatory in order to be considered for funding. Candidates will participate online in the hearing.
- The result of the jury meeting and hearings is a funding recommendation by the jury for each application: "to be funded" or "not to be funded" or "reserve candidate".

## **Formal funding decision**

The jury recommendation will be formally confirmed first by the WWTF Advisory Board and then approved by the WWTF Board of Directors.

- Applicants will be promptly informed about the decision.
- The decision may include budget cuts as well as additional conditions and recommendations.
- Applicants will receive anonymized full text reviews. Unsuccessful applicants will also receive a short statement by the jury explaining the main reasons why the application was not selected for funding.

# VRG26 / Employment and funding contract

In case of funding, WWTF will contact the VRG candidate and proponent for the steps leading to a funding contract.

The VRG leader will be provided with the necessary documents for the contract.

A signed employment contract between the VRG leader and the host institution (“Dienstvertrag”) must be sent to WWTF **no later than two months** after the formal funding decision has been made by the WWTF Board of Directors. Otherwise, the reserve candidates will be contacted to begin the contracting process.

- Only upon finalisation of the funding contract with WWTF will the name of the successful candidate(s) be published.
- Projects may start immediately but should start not later than 18 months after the formal funding decision by the WWTF Board of Directors.
- The formal funding contract will be signed between WWTF and the host institution of the VRG leader (for universities according to §27 of the Universities Act 2002). The contract provides the VRG leader with the scientific responsibility and financial authority for conducting the project.

# VRG26 / Monitoring and reporting

Funded VRG leaders are committed to delivering reports and participating in evaluation and monitoring. WWTF offers the possibility to adapt the work plan according to project needs. For details see [WWTF's Reporting and Accounting Guideline.](#)

# VRG26 / Public relations and Community activities

Funded projects will be showcased via WWTF public relations activities. This includes displaying the projects via respective websites, contributing to other multimedia activities or presenting the work at stakeholder meetings. Funded projects will also be invited to participate in community activities.
